SCHOOL MINISTRY

- As we were serving and helping people in different places through VDM.
- We have even taken part in adaption of school in the year of 2014 for poor students.
- Varighedu is the 1st place where we started our service as it is my birth place where I'm very much enthused to do something to my village.
- They are many students who are interested in studying but can't afford to go to school, then we came across to help them.
- We consulted the school management and came to know the major requirements.
- We had also discussed with the village sarpanch and other members and came to the conclusion to adopt the school with their moral support.
- Primarily we had helped books for 59 students on 27th June 2014.
